Input types, output types, output range, are programmable by the GM Pocket Portable Configurator type PPC 1090. If the above information are provided with the Purchasing Order, the unit will be configured accordingly, otherwise the unit will be supplied, by default, with the following parameters: Input Type: 4-20 mA - Output Type: 4-20 mA. The plate will record the unit type, serial number, function diagram and terminal block layout for connections.
