

Impeller Flowmeter

DHGF-10

Function

The flowmeters type DHGF-10 are impeller flowmeters.

Application

The impeller flowmeters type DHGF-10 are employed to measure volume flow of liquids. Areas of application:

- Mechanical Engineering
- Pharmaceutical Industry
- Chemical Industry
- Research and Development

Features

The series proves itself through reliable function and easy handling. Further characteristics of this model are:

- Universal mounting
- High accuracy
- High chemical resistance (ECTFE-Version)
- Threaded connection

Installation hints

The installation of the flowmeter can be done in any way in the system. The optimum deaeration will be achieved with horizontal mounting. The flow direction must be observed.

The flowmeter must not be used as a supporting part in a pipe construction.

The liquid must not contain any solids.

External magnetic fields influence the measurement. Keep sufficient distance to magnetic fields (e.g. electromotors).
